## All Fleet Engineers Spray Control Solutions do more than keep the water off...

From light- to heavy-duty applications, Fleet Engineers' spray control products are designed for durability and efficiency. With a complete line of metal and plastic fenders available in single-, double- and triple-axle configurations, the industry's most complete line of mounting brackets and advanced aerodynamic products like the AeroFlap mud flap, we are your single source for spray control solutions engineered to perform while improving your truck's performance.

### OUR PROMISE TO DO OUR PART FOR THE ENVIRONMENT

Fleet Engineers' poly fenders and our entire line of mud flaps solutions are constructed with the environment in mind. We are committed to producing products made from recycled materials, and that are recyclable, whenever possible.

Proudly made in the U.S.A.

# SPRAY CONTROL SOLUTIONS

## Metal Fenders

Fleet Engineers' metal fenders are one of the most durable and recognizable products on the road today. From standard duty to heavy duty, Fleet Engineers offers a full line of aluminum, polished stainless steel and primed steel for all applications.

Our unique Air Slipper quarter fender is in a class of its own. To provide a clean finished look, the Air Slipper quarter fender features a heavy-duty reinforcement plate on the underside so no brackets or attachments are visible.

Fleet Engineers' metal fenders are the right choice.

## Poly Fenders

Fleet Engineers' polypropylene fenders are injection molded from lightweight, structural-grade UV-protected material that performs in the most adverse conditions. Our poly fenders are not only a durable choice, but will add to the overall efficiency of your truck.

For light-duty and over-the-road applications, Fleet Engineers' poly fenders are designed to give you the performance you need while adding aerodynamic and weight-saving benefits that save you money.

## Mud Flaps and Brackets

Fleet Engineers offers a full line of individual mud flaps, mounting brackets and pre-assembled kits that arrive ready to mount to any vehicle. With a full line of spring-loaded, fabricated flap brackets to everyday bar brackets, Fleet Engineers is your one-stop shop.

Our mud flaps are made in the USA from recyclable materials and are resistant to road chemicals, grease, oil, fuel and salt. Our Mylar hot-stamping process allows us to customize the design while assuring long life of the image and lettering.

## Fender Color Options

Our poly fenders are injection molded and come in a variety of color-through options.

# PRODUCT HIGHLIGHTS

## INNOVATIVE

The X-Flex Fender Mounting System is the industry's most innovative solution, accommodating most fender designs and mounting simply, safely and quickly.

## UNIVERSAL

All Fleet Engineers fenders are available as a packaged set with hanger brackets pre-assembled for speedy installation.

Our fenders and mud flaps are universal fitting with mounting and hanger brackets to fit any configuration.

## DURABLE

All of our fenders are reinforced to ensure durability in even the most extreme conditions.

## UNIQUE

The AeroFlap mud flap's unique diamond pattern breaks up the trailing air vortex, resulting in a mud flap with less drag and decreased fuel consumption of up to 1%. It reduces spray by not atomizing, or "smashing" water droplets, creating a safer environment for everyone on the road.

## You Can Expect More

Fleet Engineers designs, manufactures and distributes comprehensive product line solutions for aerodynamics, door systems, spray control and truck and trailer parts and accessories designed to perform in the most demanding conditions. Every one of our products comes with our promise to always provide the best quality products, personalized service and competitive pricing possible.

*Look for the Fleet Engineers brand through our network of distributors, dealers and OEMs across North America, or visit us at [fleetengineers.com](http://fleetengineers.com) to learn more about how we are driving solutions to the trucking industry.*
